Lagos, Nigeria | +234 8116375994 | soceeenin102@gmail.com | successenin.onrender.com

PROFESSIONAL PROFILE

Dynamic professional with proven ability to lead training sessions and improve community literacy through educational initiatives. I'm currently building TechX, a cloud-native learning platform aimed at improving global tech literacy by creating structured learning pathways and support systems.

CORE COMPETENTIES

- Technical Research
- Version Control (Git, GitHub)
- Bash Scripting
- Linux Administration
- Infrastructure as Code (Terraform)
- Cloud Computing (AWS, Azure)

PROFESSIONAL EXPERIENCE

Associate Program Coordinator - Powerful Young Project Institute (PYP)
April 2024 - Present | Lagos Nigeria

- I conducted research on implementing large language models (LLMs) to improve efficiency and decision making in SMEs.
- Maintained detailed program records, ensuring compliance with internal policies and regulations.
- Successfully led the Guild program, recognized as the most successful program at PYP in 2024.
- Built and launched a minimum viable product of Techx, a cloud-based learning platform on AWS, fully provisioned with Terraform. It uses AWS services such as Lambda, Cognito, CloudFront, DynamoDB, API Gateway, and IAM, to run a secure REST API that collects and organizes educational YouTube content. The system also includes an AI-driven frontend that lets users explore and interact with curated learning materials in real time.

Student Intern - National Business and Technical Examinations Board (NABTEB)
January 2022 - June 2022 | Edo Nigeria.

- Supported automated data entry for the 2021 NABTEB nationwide examinations, processing assessment records using internal software tools. Operated specialized exam-processing applications and received training in operating and managing high-performance computer systems supporting the workflow.

EDUCATION

BSc Computer Science - Ambrose Alli University, Ekpoma Nigeria
Research Project - Implementation of chatbot systems in Nigerian Healthcare - My final year project explored the benefits, challenges, and recommendation for effective adoption.
